

How to Join

Common Practices

Identity Providers and Service Providers can join eduID Albania by contacting the Federation Operator Academic Network of Albania (ANA/RASH).

Applicant should confirm acceptance of the Federation Policy documents and established procedures. Approval of application is done by the ANA Directive Board consisting of representatives of Albanian universities and Ministry responsible for education. For RASH members no application and approval is needed although they have to confirm acceptance of policy and procedures stated above.

Entrance to the federation do not imply the publication of metadata to interfederation aggregators; entities that wish to be published can explicitly request to do so.

Practices on Identity Provider Registration

Institutions can join as Identity Provider if satisfied conditions described in 'Federation Policy' document; only one Identity Provider per institution is allowed.

For an Identity Provider to join eduID, the following requirements must be met:

- completed membership service agreement signed by official representative of the institution;
- provide description of their identity management practices;
- provide technical and administrative contact information;
- elements and attributes to be registered must use a domain name of that institution.

The administrators appointed by the institution would then get an access to the Metadata Manager service where they would upload the metadata of their IdP.

After the approval, the Federation Operator publishes and maintains the federation's metadata.

Subsequent changes to these elements and attributes do not require re-approval by the Federation Operator. Only, administrators appointed by the institution can modify the IdP specific information.

Practices on Service Provider Registration

Institutions can join as Service Provider if satisfied conditions described in 'Federation Policy' document.

For a Service Provider to join eduID, the following requirements must be met:

- completed membership service agreement signed by official representative of the service provider;
- provide description of the service;
- provide technical and administrative contact information;
- elements and attributes to be registered must use a domain name of that service provider.

To start the application for becoming a member of eduID Albania organizations should contact the federation at it@rash.al.

The administrators appointed by the Service Provider would then get an access to the Metadata Manager service where they would upload the metadata of their Service.

After the approval, the Federation Operator publishes and maintains the federation's metadata.

Subsequent changes to these elements and attributes do not require re-approval by the Federation Operator. Only, administrators appointed by the Service Provider can modify the service specific information.
